Although designed for rugged service, our Strap and Tee Hinges can be finished to provide an attractive appearance for residential applications.

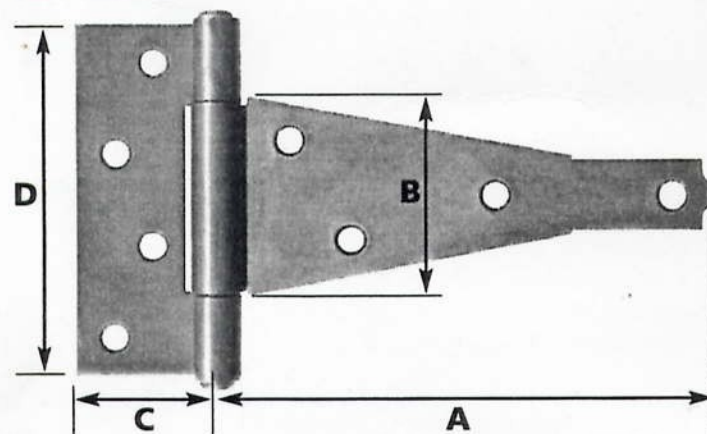

Our hinges are available in plain steel (PS) for painting or powder coating, zinc-plated (ZP), or super rust-resistant\* premium finish (ZG) selected to match the colour of pressure treated wood. Premium finished hinges feature a brass pin, while zinc-plated hinges have zinc-plated steel pins to ensure long life.

Our hinges are packaged in bulk, or in convenient quantities (2 to 4 inner cartons per outer carton) for retail distribution. Depending on the volume, the product and packaging can be bar code labeled with your UPC code and your logo stamped on the hinge.

\*Tested in accordance to ASTM B117-95 procedures at Bodycote Materials Testing Laboratories in Cambridge, Ontario. Results indicated < 2% rust after more than 500 hours of salt spray, exceeding the performance of all domestic and imported products tested.
