Confirmation of Compliance with EU Regulation 833/2014

To Whom it may concern:

In response to the Russian war of aggression on Ukraine, the European Union has imposed extensive economic and financial sanctions against Russia and Belarus. New EU sanctions prohibit imports into EU member countries of certain iron and steel products from Russia or Belarus. Additionally, certain iron and steel products, including fasteners, are also prohibited if they are processed with iron and steel inputs originating in Russia. Several non-EU nations in the European community have passed sanctions which mirror those of the EU.

Larsen & Shaw, Inc. hereby confirms that no goods sold by our company originate in Russia/Belarus or are exported from Russia / Belarus. Additionally, we hereby confirm that no iron and steel products sold by our company have been processed using iron or steel raw materials listed in Annex XVII of the EU-Regulation 833/2014 (in its currently valid version) originating in Russia.
